Proposed Project Description:

The Research Paper Management System is a comprehensive software solution designed to streamline the process of managing research papers within an academic institution. This system will facilitate collaboration between students and faculty members, providing a platform for creating, editing, reviewing, and tracking the progress of research projects. Additionally, it will offer a centralized hub for accessing journals and conferences, as well as submitting papers.

Objectives:

The primary objectives of the Research Paper Management System are:

Efficient Collaboration: Enable seamless interaction between students and faculty members for the purpose of research paper development.

Streamlined Paper Management: Provide tools for creating, modifying, and tracking the progress of research projects.

Facilitate Literature Survey: Allow students to add and delete links related to their literature survey, with the ability for faculty members to review and provide suggestions.

Meeting Requests: Enable students to request meetings with faculty members for guidance and feedback.

Faculty Review and Suggestions: Empower faculty members to review and make suggestions on student papers.

Journals and Conferences Calendar: Offer a calendar view of upcoming journals and conferences, allowing users to stay updated on relevant events.

Paper Submission: Provide a platform for submitting research papers to journals and conferences.
